AGIL ExchangeRates

Product Presentation

AGIL ExchangeRates

Solution Description

With AGIL ExchangeRates you automatically keep your exchange rates in your SAP core system up to date, save time and avoid manual transfer errors.

Exchange rates can be obtained on a regular basis in the background by Swiss or German customs or the European Central Bank and are updated directly in your SAP core system.

AGIL ExchangeRates

Benefits

Avoid manual exchange rate maintenance

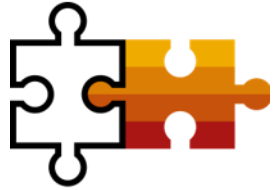

Automatically integrate the current exchange rates of the Swiss or German customs administrations or the European Central Bank into your SAP core system.

Prevent faulty exchange rates

No more wrong or outdated exchange rates in your system. Concentrate on your core business and no longer waste time on manual exchange rate maintenance.

AGIL ExchangeRates

Benefits

Benefit Quickly and Easy

The solution is available either as SaaS solution from AGILITA or as a software package on your SAP Cloud Platform. There is no need for hardware, long implementation time and interface monitoring.
