

AGIL AI.Sales

Voice-controlled ordering, GPS-supported dealer location and automatic order entry – with AGIL AI.Sales.

Optimise your sales processes with **AGIL AI.Sales** – orders by voice command, GPS-supported retailer selection and automatic order entry. Seamlessly integrated into SAP S/4HANA, increases efficiency and saves valuable time.

Overview of the solution in the APP and ERP system

Benefits

Increased efficiency through voice control

Save time by placing orders by voice command and having them processed immediately. Your sales staff can concentrate on selling while the AI takes care of the rest.

GPS based retailer selection

Thanks to AI technology, the best retailer in the area is found automatically. The app takes availability and delivery times into account to select the best retailer.

Seamless SAP integration

Our solution integrates perfectly with SAP S/4HANA to ensure smooth processes and optimize your existing systems. This ensures a consistent database and simplifies the management of your sales activities.

Convert Speech to text

Features

- ✓ **Capture orders by voice command:** The solution transcribes your speech in real time and converts it into order information.
- ✓ **Find retailers via GPS:** based on location and availability. This guarantees that your orders are processed efficiently and quickly.
- ✓ **Process orders automatically:** The AI analyses the recorded items and automatically creates orders that are forwarded for approval.
- ✓ **Real-time CRM updates:** Synchronise customer interactions on the go.
