BENEFITS

User-friendliness

Thanks to a modern SAP Fiori web interface, operation is intuitive and effortless on any device – desktop, laptop, tablet, or smartphone.

Real-time synchronisation

Real-time feedback and seamless synchronisation with ERP and HR systems ensure your data is always up-to-date and accurate.

Flexibility

Supports multiple data entry types and customizable views, along with function components that can be toggled on or off. The system seamlessly adapts to individual needs.

FUNCTIONS

Comprehensive time tracking

Track project work as well as attendance and absences for accurate documentation and reporting.

Reusable templates

Create time and expense entries based on reusable templates to increase efficiency.

Diverse data entry options

Various views for weekly, daily and external data entry offer flexibility in handling and overview.

Personalised administration

Personalised administration of time and service entries allows for individual customisation to the needs of the user.

Expandable workflows

Use business process workflows to determine control over HR process flows and responsibilities yourself and adapt or expand them as needed.

AI-supported

Our solution uses artificial intelligence to make time tracking as easy as possible. Based on your projects and previously recorded activities, the AI automatically recognizes what you might have been working on. With smart suggestions, voice input, and a user-friendly chat interface, you can review and confirm your times and services with just a few clicks. This saves time, reduces errors, and allows you to focus on what matters.

Comprehensive compatibility

Compatible with ERP systems such as SAP S/4HANA Cloud public/private Edition and SAP Business ByDesign, as well as HR systems such as HR Works, SwissSalary and SAP SuccessFactors.
